Screens

PK	screenID
	screenNo. (int)
	capacity (int)
	createdAt (dateTime)
	updatedAt (dateTime)

Movies

PK	movieID
	title (string)
	runtime (int)
	rating (string)
	createdAt (dateTime)
	updatedAt (dateTime)

Customer

PK	customerID
	email (string)
	name (string)
	createdAt (dateTime)
	updatedAt (dateTime)

Showings

PK	showingID
	startTime (dateTime)
	endTime(dataTime)
	createdAt (dateTime)
	updatedAt (dateTime)
FK	movieID
FK	screenID

Tickets

PK	ticketID
	type (string)
	createdAt (dateTime)
	updatedAt (dateTime)
FK	customerID
FK	showingID

One-to-many, but a screen must not have showing clashes (each showing must occupy its own timeslot)
